From the desk of Director

Education is not merely acquirement of facts but also of values which helps us improve the different facets of mankind. A pivotal role of education lies in shaping the personality of a child into a healthy mind and happy soul, who is not only equipped for academic excellence but helping him face the challenges of life in a balanced and harmonics way. Therefore, the system of education should works as a catalyst in making each child a balanced human being having his core strengths embedded in the learning experiences emanating our rich socio-cultural roots.

In Preteen Public School, we will enterprise to map academic excellence with a good human value system, which in myriad ways is ingrained in the culture of the school. It is my promise that school will become the hub to initiate and formalize education it has its tenets enshrined in a good value system, the extension of which is thereby taken home where it is further strengthened. And our commitment to such education will always persist in all our endeavors.

The school's genuine concern ensures student's emotional growth along with intellectual excellence. This empowers them to develop their self-esteem, self-awareness and self-confidence. Sharing ideas, analyzing situations and expressing them confidently are essential skills which will be inculcated in Preteen Public School, through experiential leaning.

WORDS OF WISDOM

From the desk of Principal

The prime objective of Preteen Public School is to focus majorly on providing a platform to a child so that he learns about his inner potential.

While studying at PRETEEN PUBLIC SCHOOL school, the students will be groomed to become confident, articulate and enlightened young citizen, ready to step global society with dignity, honour and integrity.

We believe in giving our students strong values along with a set of wings which may carry them far and wide. In other words, our students will be equipped to face the challenges of rapidly changing world. Our pedagogy is child – centric with emphasis on inquiry and project base “Learning by Doing”.

We treasure dynamism and deem that one should be well prepared to adapt the global scenario and work on his learning accordingly. This is perhaps why we have introduced a globally advanced curriculum. Besides rigorous scholastic programmes, we focus on developing both, the mental and the physical abilities of a student. The activities provide holistic grooming to the student wherein the child is able to explore his true potential. And the school will definitely prove that it is really a corridor to the future for students in due course of time.

WORDS OF WISDOM

Editor's Words

Dear Readers,

You have in your hand "Reflection", the official yearbook of Preteen Public School. The yearbook captures the moments of Preteen's journey for year 2022. I have tried my best to make sure that this memoir of Preteen Public School helps in recapitulating the eventful journey of your kids in school.

The time spent by students in school is one of the most memorable and special moment in their lives. Students should not develop the attitude of "Know All". They must remember that school is their second home and teacher is their second mother. In this regard I would like to express my feeling about the position of teacher in terms of students i.e teacher – student relationship.

A farmer sows a seed in the soil and with utmost care and patience he waits for a tiny plantlet to emerge from the seed. But his effort does not end here. He has to show even more care and nurture that plantlet so that it can become a strong fruit bearing tree and give fruits. Teachers are like those farmers with funds of knowledge and students are like those seeds which are nurtured for a brighter and better future.

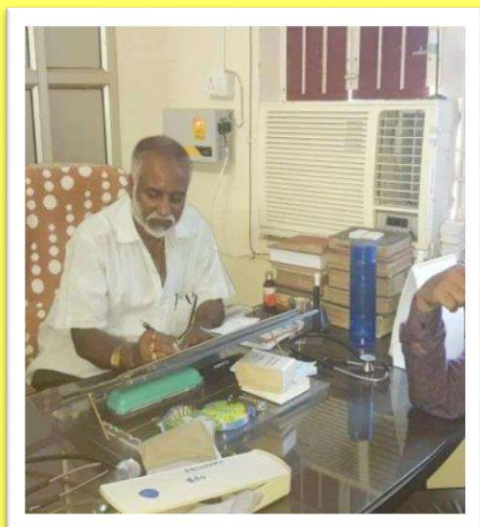

Dear student, school life plays a pivotal role in learning of life which enable you to face this fast moving world. I hope you will enjoy reading this edition of our yearbook as much as we have enjoyed putting them together.

EDUCATION MAKES OUR LIFE BETTER

As someone rightly said
"No man is foreign
Everyone lives on same Earth ,
Has the same sun and drink the same water ,
Then why to discriminate ?
Be it same size, caste, colour or religion ."

Yes, education teaches you value , makes you aware about wrong practices , helps you fight for rights and freedom and lot more . Let me tell you about a real story of a girl Akriti , who was daughter of a small farmer from a district of UP . When she was 14 years old her father succumbed to cancer. Her mother who was a teacher , took up the mantle to rising her . Instead of just quietly accepting the society norms , Akriti's mother gave her chance to unleash her potential . After attending education from a reputed school of Delhi , her hardwork and potential secured her a scholarship to attend a world's eminent Oxford University from where she did her master's. She came back and became an IPS Officer and worked to improve the lives of others . This is a real story of an IPS officer from UP. Thus the experience not only opened her mind to the world but also it enabled her to accept the different world views. Many renowned personalities such as Mahatma Gandhi , Dr B.R Ambedkar attained that empowerment due to quality education they had and contributed remarkably for the betterment of society. With this, I conclude, education indeed not only grasps available opportunities better than eventually leads a harmonious society.
